

FOR IMMEDIATE RELEASE

## DURAMAX MARINE, LLC ANNOUNCES THE LAUNCH OF DURAMAX INFRASTRUCTURE

HIRAM, OHIO - 13 July 2026

Duramax Marine®, headquartered in Hiram, Ohio, announces the launch of "Duramax Infrastructure", a new business unit established following the company's late 2024 acquisition of Morse Rubber assets in Keokuk, Iowa.

The primary product categories include highly engineered, American-made impact protection systems designed to manage impact energy and structural wear at ports, terminals, berthing structures, bridges and ferry facilities. These solutions support both rehabilitation and new construction projects, backed by proven performance, PIANC compliance, and fast-response manufacturing.

This business unit will continue to support former Morse Rubber customers across established markets while expanding capabilities to meet growing industry demand. Through strategic capital investment, Duramax Marine has significantly enhanced its design, tooling, and manufacturing capabilities to produce specialty energy absorption products such as: Buckling Column Fenders, Shear Fenders, Element Fenders, Lord-type Fenders, Commercial Dock Bumpers, and LINERITE® Composite Batter Board Material. The company will also offer large format molding of custom designs, supported by in-house engineering, testing, and product development expertise.

The creation of the Duramax Infrastructure business unit provides Duramax Marine with the opportunity to produce products previously supplied by Morse Rubber, including domestic solutions for Wharves, Piers, Docks, Terminals, Marinas, Bulkheads, and Quay Walls. Duramax Infrastructure will focus on improved service to the market with unique, domestically engineered and manufactured solutions for the American market.

"We believe heavily in American-made solutions," says Duramax Marine CEO Brian Fink.

"Designing and manufacturing in the USA allows us to pursue projects that are developed with BABA requirements in our country. We will use the experience from our decades-long service and support of the US towboat market, US Navy, US Coast Guard, and impact protection applications to consistently improve our product offerings and outperform our customers' expectations."

Duramax Marine is a 100% employee-owned company that operates two manufacturing facilities in Ohio and conducts business globally. The Duramax Infrastructure business will join the family of offerings in the commercial marine, industrial pump, and naval defense markets that Duramax services around the world.
